## GlobalThane GN208LC Polyurethane

PERFORMANCE IN COATINGS

# TECHNICAL DATA SHEET

# Polyurethane Satin Varnish

PRODUCT DESCRIPTION	1	V is a satin high performance polyurethane varnish. V can be applied on wood, flooring and in others substrates over a
PERFORMANCES	<ul> <li>Excellent UV and weather</li> <li>Excellent aesthetic look;</li> <li>Excellent application prop</li> <li>Excellent abrasion resista</li> <li>Excellent flexibility.</li> </ul>	perties;
RECOMMENDED USE	<ul> <li>Interior and exterior flooring systems as a satin finish coat, where an excelent and a durable aesthetic effect is required.</li> <li>Finish satin clear coat over 100% solids epoxy mortar flooring systems.</li> <li>Finish satin clear coat on industrial flooring systems on forklifters charging spots.</li> <li>Wood protection in house and marine environments.</li> </ul>	
APPROVALS	Complies with EU Directive 2010/42/EC: subcategory j (VOC< 500 g/l).	
COMPONENT A	COMPONENT B	COLOURS
GN208LCPV	H200P	Clear

#### **Physical Properties**

GLOSS	Satin.
SOLIDS BY VOLUME	50 ± 2,0 %
VOC*	Max. 490g/L.
FLASH POINT	24°C (Setaflash).
PERFORMANCE	

Application

SURFACE PREPARATION	All the surfaces have to be clean, dry and without contamination. The surface should evaluated and treated accordingly with ISO8504. Coated Surface: Clean, undamaged and dry compatible primer. Contact GlobalNavy o more information. Other Surfaces: Check the suitability of GN208LCPV, apply a suitable primer following Technical Data Sheet and then apply the GN208PV. Contact GlobalNavy office for furt information.	ffice for
APPLICATION METHOD	SPRAY: Use air-less spray. Use na equipment with a 170-200 bar outlet pressure. A 0,0 0,017" tip is recommended. On conventional air spray equipment, it is advisable to us pressure vessel adding the less possible thinner.	se a

## GlobalThane GN208LC Polyurethane

PERFORMANCE IN COATINGS

METHODS: Brush and roller are suitable for "stripe-coat" and small areas, care should be taken in order to achieve the dft specified. When applying on enclosed areas ensure a good ventilation with dehunidified air.         APPLICATION CONDITIONS       The substrate temperature should be minimum 10°C (32°F) and at least 4°C (7°F) above the dew point of the air, measured in the vicinity of the surface. The moisture should be < 85%. Assure a good ventilation with dry air in confined areas.         APPLICATION DATA       GlobalThane GN208 Polyurethane Varnish, is a two pack product, so the base and hardener must be mixed on the right ratio. First, mix well component A during 1 minute. After that, add all the hardener and stir very well until it get homogeneous. If necessary, for na application orphimization adjustment, the product can be diluted until 10% (//) with GN010TH. Mix completely both quantities of component A and B packs. Low temperature cause higher pot life, and higher temperatures decrease mixture pot life.         MIX RATIO       3 / 1 (by Weight)       3 / 1 (by Volume)         HARDENER       H 200P         POT LIFE       8 hours at 23°C (73°F).         THINNER       GlobalThin GN010TH.         SOLVENT / CLEANER       GN010TH         MIX TATIO       10.0 m2/Lt (407 Sq.ft/US gai) Dry: S0 µm ( (2 mils) • Wet: 100 µm (4mils).         TYPICAL PAINT SYSTEM       • GlobalThane GN123EP 1 x 0.3 Kg. GlobalThane GN208LCPV 1 x 50µm (DFT) or effort and flexelling epoxy system or effort epoxy mortars. Please contact GlobalNavy for other applications.
